

PIKOMAT pallet load protection

PIKOMAT HSS stretch hood machine

fully automatic with gusseted film tube

capacity : depending on the height of loaded pallet

capacity: 60 pal. /h

pallet dimension : 1200 x 800

height of load : max. 2400 mm incl. pallet

thickness of film : 80 – 100µm

Fully automatic stretch hood machine for water-tight packaging of pallets

- Stable construction of frame and machine
- adjustable functions of the machine to minimize the des film consumption
- control Simatik S7 / Touch Proface
- absolutely water-tight packaging

Mode of operation:

Determination of film hood length

Uncoiling of the gusseted film tube

Transfer of the film to the sealing and cutting device

Opening and spreading of the film hood

Uniform crimping of the hood

Sealing and lengthening of the film hood (determined by previous sensing of the stack height)

Lowering of the stretch angels and stretching of the film in a vertical direction

Formation of the stretch underneath the base of pallet to achieve excellent holding of the packaged goods on the pallet

Wir planen, liefern und montieren Ihre komplette Anlage!

Selbstverständlich betreut Sie unser Kundendienst auch nach der Inbetriebnahme.

PIKOMAT HSS- Stretch hood machine

capacity: depending on the stack of height ca. 60 pal / h

high-quality machine-construction
low fitting height
adjustable parameter to reduce the consumption of film

stretching underneath base of
pallet without a pallet lifting device

different kinds of pallets

compact construction
comfortable and controlled
operation

integrated in complete palletizing
lines

low maintenance (continuous
operation)

Perfect sealing of the gusseted
film tube

From filling , palletizing up to pallet load protection – Wiko delivers the complete packaging line - suiting the needs of the market!
